

ILLIA ZNACHENOK

AI SYSTEMS ARCHITECT · AGENTIC AI, FULL-STACK

Kraków, Poland · hybrid / remote

UoP or B2B · immediate start

EN · PL (A2) · RU · BY

5+ years shipping AI systems

I build agentic AI that ships — and I stay its owner after launch: **metering, alerts, recovery, honest reporting**. One person owns the full path: agent architecture → backend → infrastructure → deployment.

PROOF FROM LIVE SYSTEMS

Arkkona — live paying client, law firm ×12
3,946 pageviews in 30 days — 12× the previous period (measured in Umami). AI-visibility system for arkkonabiuro.pl: content engine with sources, answer tracking, and a Telegram bot that answers client questions — one system, two faces.

Self-operating agent box 626k
843 sessions and 626,000 messages served; 57 active scheduled jobs, SQLite→S3 replication, self-healing runs. Infrastructure I run and monitor myself.

AMBICA / INDRIVE — product in production live
Live at indra-ai.dev: free AI-readiness scan → paid concept → build. **Stripe payments running live**, client ledger, entitlement on verified payment only.

What I actually do

Multi-agent orchestration and RAG pipelines end-to-end — design, backend, infra, deploy, then the boring part everyone skips: **what happens when it breaks at 3 a.m.**

STACK

- Python, async pipelines, FastAPI
- LLM agents, RAG, tool use, evals
- MLOps: Azure AI, model lifecycle
- GCP, Docker, Railway, CI/CD
- SQLite→S3 durability, monitoring
- Reflex / web frontends, Telegram bots
- Analytics (Umami), SEO / AEO
- PyCharm + Cline — AI-assisted, single owner

Earlier deliveries (documented)

Certrux — multi-brand GTM AI orchestrator, 7 real brands (GenAI, GCP). Sterling Angels — multi-agent RAG with semantic retrieval and audit workflows. Blackline — Azure AI MLOps pipeline for production model lifecycle.

SCAN TO SEE THE WORK

Take a photo of this sheet — or scan it and we keep talking.

What I am looking for: a team that needs an architect who ships and then keeps the system alive. UoP preferred, B2B fine, Kraków hybrid or remote.

Ask me about: the 3 a.m. incident, the 12× traffic case, or what breaks agent systems in month three.
